

Bansilal Ramnath Agarwal Charitable Trust's

Vishwakarma Institute of Technology

(An Autonomous Institute affiliated to Savitribai Phule Pune University)

Structure & Syllabus of

Department of Engineering, Sciences & Humanities (DESH)

Pattern 'A-22'

F. Y. B. Tech.

Effective from Academic Year 2022-23

Prepared by: - Board of Studies in Engineering, Sciences & Humanities

Approved by: - Academic Board, Vishwakarma Institute of Technology, Pune

17	ES1014	Environmental Science	47
18	HS1036	Indian Democracy and Constitution	49
19	HS1038	Professional Development	50
20	HS1027	Induction Training	52

Program Outcomes

- 1. Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- 2. Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- 3. Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- 4. Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- 5. Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- 6. The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- 7. Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- 8. Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- 9. Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- 10. Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- 11. Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- 12. Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

Course Name: **PROBLEM SOLVING AND PROGRAMMING**Course Code: **ES1034**

Credits: 5	Teaching Scheme: Theory: 3 Hours / Week Tutorial: 1 Hour / Week Lab: 2 Hours / Week
Section I	
<p>Computing Fundamentals: Introduction to numbering systems: Decimal, Binary, Hexadecimal, Octal. Introduction to computing jargons: Nibble, Bit, Byte, Word, double word, KB, MB, GB etc.</p> <p>Overview: Introduction to C programming, Introduction to Compiler, Interpreter, Loader, linker, debugger. Indentations and comments, data types, variables, Constants: language Reserved words, data types and modifiers, Identifier naming rules, variable declaration, variable storage, character constants – character set, escape sequence, string constants, Integer constant, float and double constants</p> <p>Control Statements: if statement, if-else statement, if-else-if ladder, compound and nested if statement, switch case statement, Loop Statements: while, do while and for loops, continue statement, break statement.</p> <p>Operators and Expressions: Operators: Arithmetic operator, relational operator, logical operators, bitwise operators, stray operators, operator precedence & associativity.</p> <p>Arrays: Array Basic, Array Types, Array Declaration, initialization of array, Array Accessing, Contiguous Memory, Applications illustrating use of arrays to store ordered and unordered sequences, Multidimensional Array, Initializing and accessing multidimensional array. Representation of array in memory</p> <p>Strings: Strings Basics, Strings Declaration, Strings Initialization, NULL terminated string, reading and printing strings, string library functions</p>	
Section II	
<p>Functions: Function purpose, function declaration, definition and calling, function parameters and return type and value, passing array to function, introduction to call by value vs call by reference, Local and global variables. Recursive function – how, when, advantages and limitations.</p> <p>Pointers in C: pointer basic concept, pointer variable – declaration and initialization, pointer & *operators, why pointer to different data types are different? void pointer, pointer memory organization, pointer operations, pass by value Vs pass by reference</p> <p>Array and pointers: array name and pointer, how [] operator operates on array name, passing array to a function, Dynamic memory allocation.</p> <p>Structures, Union and Bit fields: Introduction to structure, unions and bit field: their usage and applications.</p> <p>Introduction to files: file handling, create, read, write and append.</p>	

List of Tutorials:

All tutorials must be focusing on development of a logic, flowchart, algorithm and pseudo code for the given problem statement.

1. Generate the Fibonacci series of elements.
2. Round off an integer to the next largest multiple of another integer.
3. Interchange the contents of two variables without using third variable.
4. Calculate the average of given numbers
5. Write a logic to find whether the given point (x, y) lies inside the circle with radius r, on the circle or outside the circle.
6. To calculate the monthly interest of customers fixed deposit.
7. To calculate the sum of series given as $1, \frac{1}{2}!, \frac{1}{3}!, \frac{1}{4}!, \dots, \frac{1}{n}!$
8. Test the given number as prime number
9. Test whether the given number is Armstrong number
10. Convert the binary to decimal and decimal to Binary number
11. Write the logic to print the factorial of a number
12. Reverse the given string and separate the alphabets of string.
13. Find the smallest and largest numbers from given N numbers.
14. Calculate whether the given number is divisible by 3/5/7 etc.
15. Multiplication of two matrices
16. Calculate the surface area and volume of a cylinder
17. Addition of two matrices and algorithm for use of functional pointer
18. Exchange a string from one variable to another using pointers.
19. Check whether the odd size given matrix is magic square or not
20. Enumeration of all subset, permutation, etc

List of Practical:

1. Assignment based on different operators and expressions in C.
2. Assignment based Control Statements and Looping Statements in C.
3. Assignment based on 1 D Array.
4. Assignment Based on Multidimensional array.
5. Assignment based on Strings.
6. Assignment Based on Functions in C.
7. Assignment based on Recursion.
8. Assignment based on Pointers in C.
9. Assignment based on Array pointers.
10. Assignment based on Double Pointers in C.
11. Assignment based on Structure, Union and Bit field
12. Assignment based on File handling in C

List of Projects Areas:

1. Science and Numeric Applications.
2. Number theoretic algorithms
3. 3D Graphics and Animations
4. Large integer Arithmetic using string processing
5. To solve the problems of rotational motion, Heat transfer problems etc
6. Database/File Handling Application.
7. Game development using C
8. Algorithms in computational geometry(eg. convex-hull, closest pair of points)
9. Desktop GUIs.
10. Solving statistical problems

Text Books:

1. Herbert Schildt E. Horwitz, "C: The Complete reference", TMH Publication
2. Yashwant Kanetkar, "Let Us C", BPB Publication.

Reference Books:

1. Harry. H. Chaudhary, "C Programming :The Definitive Beginner's Reference" , First MIT-CreateSpace Inc. O-D, Publishing, LLC USA .
2. R. G. Dromey, " How to solve it by Computer" Prentice Hall, ISBN 978-0134340012
3. Brian Kernighan and Dennis Ritchie, "The C programming Language" PHI; 2nd edition , ISBN-10 : 0131103628

Moocs Links and additional reading material: www.nptelvideos.in**Course Outcomes:**

The student will be able to:

1. understand use of numbering system for computer programming and contrast storage of different data types in computer memory.
2. analyze and convert a given problem statement into a program using operators and flow control statements.
3. Organize constants of identical data types into an array and use it for applications like searching and sorting.
4. justify modular programming approach by making use of functions
5. appraise the power of pointers to get insight into memory management and to improve efficiency of code.
6. arrange and store data using data structures and file handling

Course Name: ROBOT: MECHANICS AND ELECTRONICS

Course Code: ES1035

Credits: 4	Teaching Scheme: Theory: 2 Hours / Week Tutorial: 1 Hour / Week Lab: 2 Hours / Week
Section I	
<p>Robot Terminology: History and future of Robotics, Basics of Robotics, Anatomy and specification of a Robot, Classification and configurations of robots, Mechanical, Electrical and Electronics Components used in Robotics, Degree of Freedom, Robot coordinates, Roll-Pitch-Yaw, terms like accuracy, precision, resolution, repeatability etc. Robot software interface, Robot analogy with human body.</p> <p>Robot Kinematics: Kinematic linkages, reference frames, Forward and Inverse kinematics, D-H matrix, numerical examples.</p> <p>Actuators: Pneumatic, Hydraulic, Electrical – Solenoid coil, Construction, working principle of PMDC, BLDC, Stepper and Servo motors, Merits and Demerits, Applications and selection of actuators.</p>	
Section II	
<p>Semiconductor Devices: Diodes, Rectifiers, Zener Diode, LED, photo diode, opto-isolators, BJT (as switch, amplifier, and multi vibrator), FET, MOSFET, IGBT, op-amp</p> <p>Digital Electronics: Logic gates, Basic gates using transistor, Flip-flops, counters, registers, ADC, DAC.</p>	
Tutorials:	
<p>1) Force, Torque, Equilibrium, Free body diagrams, friction, centre of gravity, centre of mass, centroid and moment</p> <p>2) Practice sessions on Mechanics, Electrical Motor,</p> <p>3) Practice sessions on Basic Electronics and Logic gates</p> <p>4) Week 4 to 7 – Presentation by student</p> <p>5) Week 8 to 10 – Course Project Presentation</p>	
List of Practical:	
<p>1) Study of Mechanical components</p> <p>2) Study of Basic Electrical and Electronic components</p> <p>3) Circuit – 1, 4) Circuit – 2, 5) Circuit – 3</p> <p>6) LEGO Kit – 1, 7) LEGO Kit – 2, 8) LEGO Kit – 3, 9) LEGO Kit – 4, 10) LEGO Kit – 5</p> <p>11) LEGO Kit – 6</p> <p>Or 8-11) Course Project</p> <p>12) Lab. exam. and /or viva.</p> <ul style="list-style-type: none"> All the Lab. submissions and assignments should be in hard copy format to reduce the tendency of copying. 	
Text Books:	

1. R. K. Mittal, I. J. Nagrath, Robotics and Control, Tata McGraw Hill Publication
2. David G. Alciatore, Michael B. Hstand, Introduction to Mechatronics and Measurement Systems , 3 rd Edition, Tata McGraw Hill Publication.
3. Ferdinand P. Beer, E. Russell Johnston, Mechanics of Materials.
4. P. S. Bimbhra, Power electronics, Khanna Publishers,
5. S.B.Dewan, G.R.Slemon & A. Stranghan, Power Semi conductor controlled Drives, John Willey Pub.
6. T.Kenjo, Stepping motors and their microprocessor controls, Oxford University press, New Delhi, 2000.
7. T.Kenjo and S.Nagamori, Permanent magnet and Brushless DC motors, Clarendon press, London, 1988.

Reference Books :

1. John J. Craig, Introduction to robotics: Mechanics and Control, Prentice Hall, 2004.
2. Richard D. Klafter, Thomas A. Chmielewski, Michel Negin, Robotic Engineering: An Integrated Approach, Prentice Hall Publication.
3. Lawnthorn, Ray, Electrical machines and actuators - Electric Motors for Robots : Mechanical Power, Kindle Edition

Course Outcomes:

The student will be able to –

1. understand importance of Robotics and the terminology w.r.t. different mechanical, electrical and electronics components and their applications in Robotics..
2. understand the significance and make basic calculations based on Robot Mechanics.
3. understand the working principle and working of different actuators used in Robotics.
4. understand the concept, significance and make basic calculations based on Robot Kinematics.
5. understand use of different electronic and power devices in circuits related to Robotics.
6. understand use of different digital components and devices in circuits related to Robotics.

Course Name: MATHEMATICS AND STATISTICS

Course Code: ES1043

Credits: 3	Teaching Scheme: Theory: 3 Hours / Week Tutorial: 1 Hour / Week
Section I	
<p>Vector Spaces: Rank of matrix, Elementary Matrices, System of linear equations. Euclidean Vector space, Vector Space, Subspace, Span of a set, Spanning Set, Fundamental Subspaces, Linear Dependence, Independence, Basis and dimension of a vector space</p> <p>Linear Transformation: Definition, Kernel, Range, Matrix of Linear Transformation, One-one, Onto transformation, Geometric transformations in R^2 and R^3.</p> <p>Eigen Values and Eigen Vectors: Eigen Values and Eigen Vectors of a matrix, Diagonalization, Symmetric Matrices, Orthogonal Matrix, Orthogonal Diagonalization</p>	
Section II	
<p>Functions of two or more variables: Introduction to functions of two or more variables, limits and continuity (only introduction), Partial derivatives, chain rules, maxima and minima of functions of two variables.</p> <p>Higher order Linear Differential equations: First order linear ode, Second order ODEs and its applications: Homogeneous Linear ODE's, Non homogeneous ODE's.</p> <p>Statistics: Descriptive Statistics: Data types, Data presentation, Data Distribution, Measures of central tendency, Data shapes, Data visualization</p> <p>Random Variable: random variable-Discrete and continuous, probability mass function, probability density functions, expectation and variance of distribution, covariance and correlation coefficient.</p>	
Text Books:	
<ol style="list-style-type: none"> 1. Ron Larson and David C. Falvo, 'Linear Algebra :An Introduction', 1st Edition, Cengage Learning (Indian Edition). 2. Ron Larson and Bruce H. Edwards, 'Text book of Calculus', Brooke/Cole, a part of Cengage Learning (Indian Edition), (c) 2011. 3. Erwin Kreyszig, 'Advanced Engineering Mathematics' 10th Edition, Dec. 2010, , John Wiley and sons, Inc. 	
Reference Books:	
<ol style="list-style-type: none"> 1. David C. Lay, 'Linear Algebra and its Applications', 3rd Edition, Pearson. 2. Jim DeFranza and Daniel Gagliardi, 'Introduction to Linear Algebra with Applications', Tata McGraw-Hill Edition. 3. Gilbert Strang, 'Linear Algebra and its Applications', 4th Edition, Cengage Learning. 4. B.V. Ramana, 'Higher Engineering Mathematics' Tata McGraw-Hill publishing co. Ltd. 5. Michael D. Greenberg; Advanced Engineering Mathematics; Pearson Education Asia 	

6. Peter V. O'Neil; Advanced Engineering Mathematics; 5th edition, Thomson Brooks/Cole.

List of Tutorials:

1. Rank of matrix, Elementary Matrices, System of linear equations, Gauss-Jordan Elimination. Applications of System of Linear equations.
2. Vector space, Subspace, Span of a set, Spanning Set, Fundamental Subspaces,
3. Linear Dependence, Independence, Basis and dimension
4. Linear Transformation, Matrix representation, Eigen Values and Eigen Vectors and properties
5. Diagonalization, Symmetric Matrices and Orthogonal Diagonalization
6. Functions of several variables, domain and range, standard quadric surfaces and evaluation of partial derivatives
7. Chain rules for partial derivatives
8. maxima and minima of functions of two variables
9. Second order ODEs and its applications: Homogeneous Linear ODE's
10. Non homogeneous ODE's, Euler Cauchy Equation.
11. Descriptive Statistics
12. Random Variables

Course Outcomes:

The student will be able to –

1. solve the system of linear equations and analyze vector spaces, linear transformation.
2. recognize the concepts of spanning set, basis, dimension, linear dependence/independence, matrix of linear transformation
3. find eigen values and eigen vectors
4. demonstrate the knowledge of partial derivatives and its applications
5. solve linear differential equations and interpret the solution
6. represent, visualize and analyze statistical data

Course Name: PRODUCT DESIGN AND DEVELOPMENT**Course Code: ES1044**

Credits: 3	Teaching Scheme: Theory: 2 Hours / Week Lab: 2 Hour / Week
Section I	
<p>1.Creative Problem Solving Process and Tools - Introduction to Creative Engineering Problem Solving across Disciplines / Branches - TRIZ, 8D, and other Creative thinking tools etc.</p> <p>2.Product Lifecycle Management : Creative Product Design, development, Manufacturing, and Life-cycle Management Process. Reverse Engineering Software Product Life Cycle Management</p> <p>3.Human Centric UI-UX Design : Introduction to Aesthetics, and Human factors in Engineering Design - Ergonomics, UI- UX for Software Apps, Interface / HMI / HCI design for Controls in Engineering Products / Electronic gadgets, Industrial equipments, etc. Differently-abled Users, Usability studies</p>	
Section II	
<p>4.Design Thinking & DFX: Design Thinking, Development Stages-TRL, MRL, IRL aspects, Concepts of Quality & Reliability in product design & Development, House of Quality, Quality Function Deployment (QFD), Failure Modes & Effects Analysis (FMEA), Types of FMEA, Robust Design, Case studies Other DFX areas from various fields (IT, Instru., Elex, etc.)</p> <p>5. Introduction to Product Visualisation and Communication: Tools and Techniques - Sketching, Drawing, Data Visualization, Standardization, Drafting, Wireframe design of Software Apps / Industrial Products, Prototyping</p> <p>6.Product Viability & Cost Analysis: Practical aspects like Industrial Organization, Management and Economics related to New Product Development. Sustainable /Green aspects of Product Development. Case studies.</p>	
List of Practical:	
<ol style="list-style-type: none"> Reverse Engineering of a simple machine / Toy / gadget / PC. Real life Creative Engg. problem solving - Using TRIZ / other techniques Case studies based on Interdisciplinary product development & PLM. Design and Develop a web or mobile app or an industrial control panel / HMI making use of the effective UI , UX , Human Centric Design principles Experiments on various manufacturing tools / processes for hands-on experience. Lab.-Experiment based on DFX / QFD - Quality Function Deployment / FMEA-Failure Modes and Effects Analysis Lab.-Experiment based on Assignment based on Design Visualization and communication using Tools like Tableau, Canva, Autodesk Sketchbook, etc. Product Development Project management, Team work planning and costing on the 	

course project using modern techniques like Agile and SCRUM.

9. Case study on Software Product Design
10. Case study product Design for differently-abled users
11. Methods of Prototypes & Utility
12. User Surveys for Product Performance Improvement
13. Product Costing analysis for a physical/ Software/ service Product
14. Value Engineering analysis of a physical / Software/ service Product

Text Books:

1. Ulrich, Karl T., Eppinger, Steve D., and Yang, Maria C., Product Design and Development. 7th ed., McGraw-Hill Education, 2020.
2. Kevin N. Otto, Kristin L. Wood · Product design: techniques in reverse engineering and new product development, 2001, Prentice Hall
3. Anil Mital & et al, Product development: a structured approach to consumer product development, design, and manufacture, 2008.
4. Liu, Carl, Innovative Product Design Practice, 2015
5. Chitale A K & Gupta R C , Product Design and Manufacturing ,PHI

Reference Books:

1. Industrial Designers Society of America, Design Secrets: Products: 50 Real-Life Product Design Projects, 2001.
2. Beno Benhabib, Manufacturing: Design, Production, Automation, and Integration (Manufacturing Engineering and Materials Processing), 2003
3. Gavin Ambrose and Paul Harris, Basics Design 08: Design Thinking, Bloomsbury Publishing India

Moocs Links and additional reading material:

<https://www.pdd-resources.net/resources.html>

Course Outcomes:

The student will be able to

1. have a 360° understanding of the role of an engineer in society.
2. apply the understanding of Product life cycle phases & their Characteristics.
3. interpret & apply the Human & user centric aspects of Design and UI-UX.
4. understand the contemporary principles of design thinking, DFX etc
5. apply the techniques of Visualization and Modeling.
6. understand and apply sustainability aspect of product design and development .

Course Name: DESIGN THINKING 1

Course Code: ES1041

Credits: 1	Teaching Scheme: Tutorial: 1 Hours / Week
Section I	
<p>Fundamentals of Research (What is research?)</p> <p>Meaning of the terms Discovery, Research, Invention, Innovation, Novelty, Creativity and the difference between them with example. Videos of great inventions, Need for Research:- Socio-economic development, research impact on society and research impact on economy, explanation with one example for each, Examples of Engineering Research, Research Types Fundamental and applied with example and importance of both, and Research Components:-Tools, techniques and algorithms and domains in which it is used innovatively Identification of research problem:- Finding and reviewing the literature, Sources of literature, Types of research papers: Conference, Journals etc, framing of research problem statement and synopsis.</p> <p>Conference</p> <p>What is a conference? (International and National), Format of a conference, conference Theme, Invitation, selection process, keynote address, parallel sessions, oral and poster presentation, valedictory, selected papers for journals and explorer, conference proceedings.</p> <p>Research Journals</p> <p>What is a Research Journal? (International and National), Types of journals, Scopus, peer reviewed, refereed, Transactions and letters, various journal publishers like Elsevier, Springer, Taylor and Francis, ASME etc. Journal formats List of standard professional societies like IEEE, ASME, SAE etc</p> <p>Literature Review</p> <p>Meaning, Effective searching of literature, cross referencing, identifying research gaps, organizing the selected papers, Summary of literature review</p>	
Section II	
<p>Research Paper Writing</p> <p>Structure of research paper; Title and abstract, Introduction, Method, Evaluation, Conclusion, References, Writing a research paper-Style of writing and formatting, Processing and Displaying Data:- Charts –Various types of charts through ms-excel format, Types of charts, Error bars, trend line; Figures; Tables, PPT, Preparation of posters. Referencing: Writing reference to research paper; Use of referencing style and tool, typical format of references like Books, Book Chapters, Journal Articles, Conference Papers, Technical Reports and Internet Sources.</p>	

Journal Ratings and Evaluation (How to rate a Journal?)

Meaning of impact factor and citation index like h-index. Who gives it and how gives it? Calculation of impact factor, Example for calculation of impact factor and h-index, Importance of publication house in selecting a journal, Process for journal paper review

Intellectual property (IP)

Introduction to IPR, Overview & Importance, Patents, their definition; Patent search, process of patent application; Copyrights, their definition; granting; searching & filing, Trademarks, role in commerce, importance, protection, registration; Case studies in IPR, charges for filing patents.

Research Ethics

Plagiarism, Authorship, use of language, Protecting confidentiality, Conflicts of interest, Research with humans and animals

Entrepreneurship:

Introduction to Entrepreneurship, Meaning and concept of entrepreneurship, The Entrepreneur, Meaning of entrepreneur, the skills required to be an entrepreneur, the entrepreneurial decision process, Business Opportunity Identification: Business ideas, methods of generating ideas, and opportunity recognition, Preparing a Business Plan: Meaning and significance of a business plan, components of a business plan, and feasibility study, Financing the New Venture: Importance of new venture financing

Text Books:

1. C.R. Kothari , Research Methodology, Methods and Techniques ,2nd Edition, New Age International Pvt. Ltd., Publishers (2004)
2. R. Panneerselvam, Research Methodology, Prentice Hall Of India, New Delhi,2004
3. Vinayak Bairagi, Mousami V. Munot, Research Methodology: A Practical and Scientific Approach, 1st Edition, CRC Press, (2019)

Reference Books:

1. W. M. Trochim, Research Methods: the concise knowledge base, Atomic Dog Publishing,2005
2. Arun Sharma, "How to Prepare for Logical Reasoning", McGraw Hill Publication.

1. <https://nptel.ac.in/courses/121/106/121106007/> (Introduction to Research by IIT Madras)
2. <https://nptel.ac.in/courses/109/106/109106137/> (Intellectual Property by IIT Madras)
3. <https://nptel.ac.in/courses/109/105/109105112/> (Introduction on Intellectual Property to Engineers. By IIT Kharagpur)
4. <https://nptel.ac.in/courses/110/106/110106141/> (Entrepreneurship , by IIT Madras)
5. <https://nptel.ac.in/courses/127/105/127105007/> (Entrepreneurship Essentials, By IIT Kharagpur)
6. <https://nptel.ac.in/courses/110/107/110107094/> (Innovation, Business models and Entrepreneurship,

by IIT Roorkee)

7. <https://nptel.ac.in/courses/110/105/110105091/> (Research Writing, by IIT Kharagpur)
8. <https://nptel.ac.in/courses/109/105/109105115/#video> (Qualitative Research methods and Research Writing, by IIT Kharagpur)
9. https://swayam.gov.in/nd1_noc20_hs66/preview (Entrepreneurship and IP strategy, by IIT Kharagpur)

Course Outcomes :

The student will be able to –

1. understand the importance of doing research and its socio-economic impact
2. interpret and distinguish different fundamental terms related to research, discovery, invention, innovation etc.
3. apply the methodology and tools of doing research and mode of its publication
4. write a Research Paper based on project work.
5. understand Intellectual property rights (IPR).
6. use the concepts of Ethics in Research.
7. understand the Entrepreneurship and Business planning

Course Name: ENGINEERING DESIGN AND INNOVATION - I

Course Code: ES1025

Credits: 4

Teaching Scheme: Theory: 8 Hours / Week

Activities

This course is Project Centric Learning providing hands on experience to students. Theoretical inputs / information will be provided through Design Thinking 1 Sessions while actual designing and implementations of project work is done through EDI-1.

Step by step Implementation of activities by the students:

1. **Group Formation Activity:** - Project group formation within the allotted EDI-1 Project batch, deciding Group leader and Assistant Group Leader
2. **Brain Storming and Discussion Activity:** - Discussion on topics for EDI-1 Project pertaining to Socially relevant areas as discussed in the subject Design Thinking 1 (DT1). Discussion on Domain areas and identifying the domain area
3. **Dissuasion** on the selected domain area and required Tools and Technology also discussed in the subject Design Thinking 1 (DT1) for the project
4. **Project Planning Activity:-** Discussion on Tools and Technology, Finalization of EDI-1 Project topic considering appropriate Domain area, Tools & Technology in consultation with EDI-1 project Guide
5. **Project Planning Activity:-** Finalization of Problem statement, objectives, methodology and systematic strategy to complete the EDI-1 project in consultation with EDI-1 Project guide
6. **Synopsis Drafting Activity:-** Prepare Synopsis of the planned EDI-1 project under the guidance of EDI-1 Project guide and complete its online Registration
7. **Team Work Activity:-** Report and update about project work progress regularly to EDI-1 Project guide and timely complete the assigned tasks by him. Seek his advice guidance whenever required.
8. **Self Learning Activity:-** Refer available online offline Resources, books, soft materials, consult with domain expertise in context with the project
9. **Self Learning Activity:-** Learn the required tools, skill sets, acquire knowledge through relevant MOOCs for the project
10. **Project Review 1 , Mid Semester Assessment & Project Review 2:-** As part of in semester assessment of the Capstone Project appear for the timely conducted project reviews by EDI-1 Project guide to evaluate student progress
11. **Project Prototype Designing Activity:-** Designing of project prototype based on domain areas by incorporating appropriate tools and technology
12. **Prototype Validation and Testing Activity:-** Validation and Testing Activity of the prototype and the obtained results to give the best possible solution
13. **Project Report/Paper Writing Activity:-** Completion of the set objectives of project and to start

writing report of the EDI-1 Project in IEEE Research paper format

14. **Project Report/Paper Writing Activity:-** Results and Discussions, writing the Interpretation of the obtained results of the accomplished EDI-1 Project work in the report i.e. IEEE paper in systematic format and preparing the final PPT for final end sem assessment of the project
15. **Final checking and Report/Paper Proof Reading Activity:-** of the IEEE project paper and PPT by EDI-1 Project guide followed by its approval after doing the needful corrections.
16. **Online** submission of pdf of the IEEE Paper based of EDI-1 Project for the record
17. **End Semester Assessment:-** Present the IEEE Paper based of EDI-1 Project and the PPT at Student EDI-1 Project Conference on the scheduled date as part of End Semester Assessment of the EDI-1 Project
18. **Paper presentation on the project work Conference :-** Present the as prepared paper on the Project work at suitable National/International Conference
19. **Journal Publication :-** Publish the quality project work in a peer reviewed and International/ National Research journal with reputed indexed in Web of Science/Scopus/UGC CARE)
20. **Patent/ Innovation :-** If the project work done has novelty, innovation and future commercial aspects then file a Patent on it

Text Books:

1. K Nagrajan , Project Management 2nd Edition, New age International Ltd.(2004)
2. PradeepPai, Project Management, 1st Edition, PEARSON INDIA (2019)
3. Yousef Haik and Tamer M. Shahin, "Engineering Design Process", Cengage Learning, Second

Reference Books:

1. H. S. Fogler and S. E. LeBlanc, "Strategies for Creative Problem Solving", 2nd edition, Pearson, Upper Saddle River, NJ, 2008.
2. A. Whimbey and J. Lochhead, "Problem Solving & Comprehension", 6th edition, Lawrence Erlbaum, Mahwah, NJ, 1999.
3. M. Levine, "Effective Problem Solving", 2nd edition, Prentice Hall, Upper Saddle River, NJ, 1994.
4. John. R. Karsnitz, Stephen O'Brien and John P. Hutchinson, "Engineering Design", Cengage learning (International edition) Second Edition, 2013.

Course Outcomes :

The student will be able to –

1. identify projects relevant societal needs
2. map the technologies learned with the project needs
3. apply the technological knowledge to design various feasible solutions
4. Select best possible solution to solve the problem
5. develop/Fabricate a working model of the proposed solution
6. testing and validate product performance

Course Name: MECHATRONICS AND ROBOTICS

Course Code: ES1024

Credits: 5	Teaching Scheme: Theory: 3 Hours / Week Tutorial: 1 Hour / Week Lab: 2 Hours / Week
Section I	
<p>Sensors: Proximity sensor (Range sensor), Tactile sensor (Contact sensor), Current sensor, Tilt sensors, Light sensor, Gyroscope, Encoders, Hall effect sensors, Temperature sensor, Acceleration sensor, Image sensor, Camera etc.</p> <p>Microcontrollers :</p> <p>Microcontroller, ATmega, architecture, peripherals, ports, registers, timer, counter, serial communications, ADC, interrupts etc.</p> <p>Microcontroller programming & interfacing : Embedded C Programming, Port configuration - for Signal in and Signal out configuration and programming, Interfacing of relay, stepper motor, LCD display, keyboard etc.</p>	
Section II	
<p>Actuators and Control: Interfacing of Relay, Solenoid, programming for control, motor driver and speed control – PWM.</p> <p>Serial Communication Systems: Introduction to Serial communication w.r.t. ATmega328P – RS232, I2C, SPI, WiFi, Blue Tooth.</p> <p>Industrial Robotics and Applications: Introduction to different systems in Industrial Robotics, Automation, PLC, Basics of Ladder programming, Ladder logic, basic instructions, Introduction to SCADA.</p>	
Tutorials:	
<ol style="list-style-type: none"> 1. PPT sessions on different topics allotted to groups 2. One topic per group per round 3. Week 1 to 5 – Round 1 4. Week 6 to 10 – Round 2 	
List of Practical:	
<p>Interfacing of following components with Arduino Uno.</p> <p>1) LED with Arduino 2) LDR 3) Push Button / Micro Switch 4) Ultrasonic Sensor</p> <p>5) IR array 6) Temperature sensor 7) 16x2 LCD 8) 7 Segment Display</p> <p>9) Bluetooth module 10) PMDC Motor 11) Servo Motor 12) Lab. exam. and/ or viva.</p>	
Text Books:	
<ol style="list-style-type: none"> 1. R. K. Mittal, I. J. Nagrath, Robotics and Control, Tata McGraw Hill Publication 2. Muhammad Ali Mazidi, The 8051 Microcontroller and Embedded Systems using Assembly and C, 	

2nd edition, Pearson

3. Kenneth Ayala ,The 8051 Microcontroller (with CD) , Cengage Learning
4. – Fu, Lee ,Robotics – Control, Sensing, Vision and Intelligence, TataMcGraw Hill
5. Vijay Singh ,Fundamentals of Programmable Logic Controllers, New Age International (P) Ltd.
6. Hackworth, Programmable Logic Controllers Programming Methods And Applications with CD, Pearson India.
7. George Kennedy and Bernard Davis, S R M Prasanna,Kennedy’s Electronic Communication System (SIE), McGraw Hill Education.
8. Arduino Made Simple: With Interactive Projects
9. Brock Craft ,Arduino Projects for Dummies, John Wiley & Sons Inc.
10. Serial Communication by :-Dr.UditSatija, IIT Patna.Lecture 16 : Embedded System- Serial Communication (Synchronous, Asynchronous, UART, CAN)-Part 1 and Lecture 17 : Embedded System-Serial Communication (I2C, SPI, RS-232)-Part 2.

Reference Books:

1. John J. Craig ,Introduction to Robotics: Mechanics and Control, Prentice Hall, 2004.
2. Richard D. Klafter, Robotic Engineering: An Integrated Approach, Thomas A. Chmielewski, Michel Negin, Prentice Hall Publication.
3. Lawnthorn, Ray, Electrical machines and actuators - Electric Motors for Robots : Mechanical Power, Kindle Edition

Course Outcomes:

The student will be able to –

1. identify different sensors, understand their significance related to Robotics and select a sensor as per the requirement.
2. understand the internal configuration and architecture of microcontroller.
3. interface different sensors and peripherals to a microcontroller and program the same.
4. interface different display devices, actuators and control them using a program.
5. Use different communication protocols to control a robot.
6. understand significance of different systems used in Robotics and Automation.

Course Name: DISCRETE MATHEMATICS

Course Code: ES1030

Credits: 4	Teaching Scheme: Theory: 3 Hours / Week Tutorial: 1 Hour / Week
Section I	
<p>Sets, Functions and Relations: Operations on sets, Cardinality, Finite and infinite sets, Relations, and their properties, N-ary relations and their applications, Representing relations, Equivalence relations, Partitions, Partial order relation, Posets, Hasse diagrams, Lattices, Chain, Antichains, Types of functions, sequence, summation, Countable and uncountable sets, Cantor diagonal argument for the power set</p> <p>Basic Counting Principles: Permutations and combinations, Binomial coefficients and identities, Principles of inclusion and exclusion and its applications. Mathematical Induction, Pigeonhole principle, Elementary applications to discrete probability.</p> <p>Number Theory: Divisibility, GCD/LCM, The Euclidean algorithm, Prime numbers, Integers, Fundamental theorem of arithmetic, Remainder theorem, Modular arithmetic, Solving congruence's, Arithmetic with a prime modulus, Arithmetic with an arbitrary modulus, Euler's Phi function, Euler's theorem, Fermat's Little theorem, Applications in cryptography</p>	
Section II	
<p>Recurrence relations: Linear recurrence relations with constant coefficients (homogeneous case); Linear recurrence relations with constant coefficients (non-homogeneous case); homogeneous and particular solutions. Solution of linear recurrence relations using generating functions. Applications to linear systems.</p> <p>Graph Theory: Definition, types of graph, directed, undirected, directed acyclic, and bipartite graphs, Connected components, Eulerian graphs, Hamiltonian cycles, Incidence matrices, Adjacency matrix, relationship between the matrices. Graph coloring, Planar graphs, planarity testing algorithms, dual graphs and dual-networks, complete graphs and crossing numbers, trees, Introduction to Trees, Application of Trees, Tree Traversal, Spanning Trees, Minimum Spanning Trees, Flows in Networks graphs, fundamental cut-set and loop-set, Graph theoretical models.</p>	
List of Tutorials:	
<ol style="list-style-type: none"> 1. Sets, Functions and Relations, Properties of relations and functions 2. Equivalence relations, Posets, Hasse diagrams, Lattices 3. Permutations and combinations, 4. Principles of inclusion and exclusion and its applications, Pigeonhole principle 5. Divisibility, GCD/LCM, the Euclidean algorithm and Modular arithmetic 6. Solving congruences 7. Euler's Phi function Euler's theorem, Fermat's Little theorem, Applications in cryptography 	

8. Examples on various types of graphs
9. Examples on tress
10. Applications of graph theory

Text Books:

1. Kenneth H Rosen: Discrete Mathematics and its Applications, McGraw Hill (2012).
2. Richard Johnsonbaugh: Discrete Mathematics, Eighth Edition, Pearson.

Reference Books:

1. C. Liu, D. Mohapatra[CM]. Elements of Discrete Mathematics. 2008. Tata McGraw-Hill
2. H. Van Lint, R. M. Wilson: A Course in Combinatorics ,Cambridge University Press.
3. J. P. Tremblay, R. Manohar:Discrete Mathematical Structures with Applications to Computer Science, 1 st Edition ,Tata McFraw-Hill
4. D.B.West, Introduction to Graph theory, Prentice hall of India, 1998.

Course Outcomes:

The student will be able to –

1. understand and evaluate sets, relations, functions, number system,
2. identify and use operations on sets, relations, functions, combinatorial identities
3. analyze and interpret the concepts of divisibility, prime number, modulo arithmetic, congruence and number theorems
4. construct and solve recurrence relations
5. understand and apply terminology of graph theory, types of graphs, matrices associated with graphs, trees.
6. translate a physical problem into a mathematical model, find solution of the model by selecting and applying suitable mathematical method

Course Name: DATA STRUCTURES USING PYTHON

Course Code: ES1038

Credits: 4	Teaching Scheme: Theory: 3 Hours / Week Lab: 2 Hours / Week
Section I	
<p>Fundamentals of Python : Features of Python, How to Run Python code, Identifiers, Reserved Keywords, Variables, Comments in Python, Indentation in Python, Input, Output statements.</p> <p>Operators: Arithmetic Operators, relational Operators, Logical Operators, bitwise operators, other stray operators, Operator Precedence, Strings in python: subscript operator, indexing, slicing a string, string methods</p> <p>Flow Control and Loops: if statement, if...else statement, if..elif ..else statement, Nested if statement; while loop , for loop, range() function, continue and break statement, while and for loop with else statement, pass statement.</p> <p>In-built Data Structures in Python: List, Tuple, Set, Dictionary; Mutable and Immutable Objects, Data Type Conversion, Built-in methods and comprehensions.</p>	
Section II	
<p>Functions and Modules</p> <p>Function Definition, Function Calling, Function Arguments, Anonymous Functions (Lambda Functions), recursive function, Function with more than one return value, default value to parameter, keyword parameter.</p> <p>Modules and Packages: Built-in Modules, Creating Modules, import Statement, import with renaming, from...import statement, import all names, Locating Modules, PYTHONPATH variable, Namespaces and Scope: dir() , reload() functions , Packages in Python.</p> <p>File Handling: Opening a File, Modes for Opening a File, Attributes of file object, closing a File, reading from a File, writing to a File, File Methods.</p>	
List of Tutorials: (Any Three)	
<ol style="list-style-type: none"> 1. A timestamp is three numbers: a number of hours, minutes and seconds. Given two timestamps, calculate how many seconds is between them. The moment of the first timestamp occurred before the moment of the second timestamp. 2. Hour hand turned by α degrees since the midnight. Determine the angle by which minute hand turned since the start of the current hour. Input and output in this problems are floating-point numbers. 3. Write a program that solves a linear equation $ax = b$ in integers. Given two integers a and b (a may be zero), print a single integer root if it exists and print "no solution" or "many solutions" otherwise. 4. A prime number is a natural number greater than 1 that has no positive divisors other than 1 and itself. Given two integers A and B, print the number of primes between them, inclusively. 	

5. Given a string. Cut it into two "equal" parts (If the length of the string is odd, place the center character in the first string, so that the first string contains one more character than the second). Now print a new string on a single row with the first and second half's interchanged (second half first and the first half second) Don't use the statement if in this task.
6. A sequence consists of integer numbers and ends with the number 0. Determine how many elements of this sequence are equal to its largest element.
7. In chess it is known that it is possible to place 8 queens on an 8×8 chess board such that none of them can attack another. Given a placement of 8 queens on the board, determine if there is a pair of queens that can attack each other on the next move. Print the word NO if no queen can attack another, otherwise print YES. The input consists of eight coordinate pairs, one pair per line, with each pair giving the position of a queen on a standard chess board with rows and columns numbered starting at 1.
8. Given a positive real number aa and integer nn. Compute anan. Write a function power(a, n) to calculate the results using the function and print the result of the expression.

Don't use the same function from the standard library.

9. To keep record of patients' medical data, manipulate files to store, update, and delete such information.
10. Insert and retrieve data of an insurance company by manipulating database tables.

List of Practical: (Any Six)

1. A school decided to replace the desks in three classrooms. Each desk sits two students. Given the number of students in each class, print the smallest possible number of desks that can be purchased. The program should read three integers: the number of students in each of the three classes, a, b and c respectively.
In the first test there are three groups. The first group has 20 students and thus needs 10 desks. The second group has 21 students, so they can get by with no fewer than 11 desks. 11 desks is also enough for the third group of 22 students. So we need 32 desks in total.
2. H hours, M minutes and S seconds are passed since the midnight ($0 \leq H < 12$, $0 \leq M < 60$, $0 \leq S < 60$). Determine the angle (in degrees) of the hour hand on the clock face right now.
3. Given integer coordinates of three vertices of a rectangle whose sides are parallel to the coordinate axes, find the coordinates of the fourth vertex of the rectangle. In the first test the three given vertices are (1, 4), (1, 6), (7, 4). The fourth vertex is thus (7, 6).
4. There was a set of cards with numbers from 1 to N. One of the card is now lost. Determine the number on that lost card given the numbers for the remaining cards.
Given a number N, followed by N - 1 integers - representing the numbers on the remaining cards (distinct integers in the range from 1 to N). Find and print the number on the lost card.
5. Given a string. Delete from it all the characters whose indices are divisible by 3.
6. Given a sequence of integer numbers ending with the number 0. Determine the length of the widest

fragment where all the elements are equal to each other.

7. In bowling, the player starts with 10 pins at the far end of a lane. The object is to knock all the pins down. For this exercise, the number of pins and balls will vary. Given the number of pins N and then the number of balls K to be rolled, followed by K pairs of numbers (one for each ball rolled), determine which pins remain standing after all the balls have been rolled. The balls are numbered from 1 to N (inclusive) for this situation. The subsequent number pairs, one for each K represent the start to stop (inclusive) positions of the pins that were knocked down with each role. Print a sequence of N characters, where "I" represents a pin left standing and "." represents a pin knocked down.
8. Given a sequence of integers that end with a 00. Print the sequence in reverse order.
Don't use lists or other data structures. Use the force of recursion instead.
9. To keep record of students' data, manipulate files to store, update, and delete students' information.
10. Insert and retrieve data of a company by manipulating database tables.

List of Projects:

Students will be doing course projects in different areas of application of python programming such as web application, data analysis, computer vision, machine learning, artificial intelligence, web technologies, numerical analysis etc.

Text Books:

1. "Programming And Problem Solving With Python", Ashok Kamthane and Amit Ashok Kamthane , ISBN 9789387067578
2. "Beginning Programming with Python for Dummies", John Paul Mueller , Wiley Publishing, ISBN 9788126553488

Reference Books:

1. Dive into Python 3: Mark Pilgrim, Jesse Noller, Wiley Publishing , ISBN 9788184899115.
2. Python in Easy Steps, Tata McGraw Hill Education, ISBN 9789351343080
3. Learning Python, 5th Edition, Mark Lutz, O'Reilly, ISBN 978-1449355739

Moocs Links and additional reading material: www.nptelvideos.in

Course Outcomes:

The student will be able to –

1. understand Python programming basics and paradigm
2. demonstrate different mathematical functions and string manipulation functions in Python.
3. learn to apply core Python scripting elements such as flow control structures and loops.
4. develop essential skills in python programming concepts like data structures and different built in functions.
5. justify modular programming approach by making use of functions and modules
6. demonstrate the ability to handle files in different modes and database connectivity

Course Name: COMPUTER ORGANIZATION AND ARCHITECTURE

Course Code: ES1045

Credits: 2	Teaching Scheme: Theory: 2 Hours / Week
Section I	
<p>Basic concepts of Digital Electronics: Computer Organization and Architecture, Structure and Function, Evolution (a brief history) of computers, Von Neumann Architecture, Evolution of Intel processor architecture- 4 bit to 64 bit, Interconnection Structures instruction execution cycle, interpretation of instructions, Instruction Pipeline</p> <p>Number System and Computer Arithmetic: Integer Representation, Integer Arithmetic:2's Complement arithmetic, multiplication, Booth's Algorithm, Division Restoring Algorithm, Floating point representation: IEEE Standards for Floating point representations</p> <p>RIS C Processors: RISC-Features, CISC Features, Comparison of RISC &CISC Superscalar Processors. Super pipelined Processor.</p> <p>Fundamental Concepts and processor organization: Single Bus CPU organization, register transfers, Performing arithmetic/ logic operations, fetching a word from memory, storing a word in memory, Execution of a complete instruction. Micro-operations, Hard wired Control, Example- Multiplier CU. Micro-programmed Control: Microinstructions,</p>	
Section II	
<p>Input and Output System : External devices, I/O modules- Module function and I/O module structure, Programmed I/O- overview, I/O commands, I/O instructions, Interrupt driven I/O- design issues. Direct Memory Access- drawbacks of programmed and interrupt driven I/O, DMA functions, I/O channels and processors- evolution and characteristics</p> <p>Hierarchical memory system- Characteristics, Size, Access time, Read Cycle time and address space. Principle of Locality of Reference. Main Memory Organization: ROM, RAM, EPROM, E²PROM, DRAM</p> <p>Cache memory Organization: Address mapping. Basic concepts: role of cache memory, Virtual Memory</p> <p>Parallel Processing Paradigm – Parallelism in Uni processor system, Evolution of parallel processors, Architectural Classification, Flynn's Classification, Need and basics of Multi core architecture , Multi core Model Case Study of Raspberry Pi Single board Computer – Raspberry Pi 0,/Raspberry pi 4</p>	
Text Books:	
<p>1. William Stallings, "Computer Organization and Architecture: Designing for Performance", 7th Edition, Pearson Prentice Hall Publication, ISBN 81-7758-9 93-8.</p> <p>2. C. Hamacher, V. Zvonko, S. Zaky, "Computer Organization", 5th Edition, Tata McGraw Hill</p>	

Publication, ISBN 007-120411-3.

3. Kai Hwang, Advanced Computer Architecture;, Tata McGraw-Hill ISBN 0-07-113342-9

Reference Books:

1. Hwang and Briggs, “Computer Architecture and Parallel Processing”, Tata McGraw Hill Publication ISBN 13: 9780070315563.

2. A. Tanenbaum, “Structured Computer Organization”, Prentice Hall Publication, ISBN 81 –203 – 1553 – 7, 4th Edition.

MOOCs Links and additional reading material:

1. www.nptelvideos.in 2. <https://learn.saylor.org> 3. <https://www.coursera.org>

4. <https://swayam.gov.in> 5. <https://teach-sim.com>

6. <https://www.raspberrypi.com/documentation/computers/processors.html>

Course Outcomes :

The student will be able to –

1. demonstrate computer architecture concepts along with Computer arithmetic and various related algorithms
2. understand design of modern processors, Instruction pipeline.
3. illustrate the micro-operations sequencing.
4. understand concepts related to memory & IO organization
5. understand need and design of modern processor architecture.

Course Name: COGNITIVE APTITUDE**Course Code: ES1031**

Credits: 3	Teaching Scheme: Theory: 3 Hours / Week
Section I	
Coding Decoding, Direction Sense, Blood Relations, Analogy (word, letter, number, mixed), Ranking and Ordering, Eligibility Testing, Syllogism, Inequalities, Sitting Arrangements, Clock and Calendar, Statements & Arguments, Statements & Course of Action, Cause and Effect, Cubes and Dice, Image Analysis (mirror & water images), Cubes and Cuboid, Error Detection, Grammar, Cloze Test, Comprehension, Double Fillers, Para jumbled sentences, One-word substitution	
Section II	
Divisibility Rules, Numbers, Factors and multiples, Applications of HCF and LCM, Ratio, Proportion, Variation, Linear Equations, Number Systems, Ages, Averages, Percentage, Ratio and Proportion, Simple Interest, Compound Interest, Mensuration. Time & Work, Pipes and Cisterns, Boats and Streams, Partnerships, Problems on Trains, Working with different efficiencies, Work equivalence, Division of wages, Relative Speed, Problems based on Races, Percentages as Fractions and Decimals, Fundamental Counting principle, Basics of Permutation and Combination, Probability	
Text Books:	
1. Dr. R. S. Aggarwal, “Quantitative Aptitude for Competitive Examinations”, S. Chand Publications. 2. Dr. R. S. Aggarwal, “A Modern Approach to Logical Reasoning”, S. Chand Publication.	
Reference Books:	
1. PeeyushBhardwaj, “TheHands-on Guide to Analytical Reasoning and Logical Reasoning”, Arihant Publication. 2. Arun Sharma, “How to Prepare for Logical Reasoning”, McGraw Hill Publication. 3. NishitSinha, “Logical Reasoning and DI”, Pearson Publication. 4. Moore, Parker, “Critical Thinking”, McGraw Hill Publication. 5. Arun Sharma, “How to Prepare for Quantitative Aptitude”, Tata McGraw Hill. 6. K. SarveshVerma, Quantitative Aptitude Quantum Cat Common Admission Test, Arihant Publications.	
Course Outcomes :	

The student will be able to –

1. improve analytical and logical reasoning ability.
2. identify and Evaluate deductive and inductive arguments.
3. identify logical errors and false conclusions.
4. improve aptitude, problem solving skills and reasoning ability.
5. critically evaluate various real-life situations by resorting to analysis of key issues and factors.
6. demonstrate various principles involved in solving mathematical problems and thereby reducing the time taken for performing job functions.

Course Name: DESIGN THINKING 2

Course Code: ES1042

Credits: 1	Teaching Scheme: Tut: 1 Hours / Week
Section I	
<p>Structure of Research Paper</p> <p>Title, Abstract, Keywords, Introduction (Literature review), Methodology, Design/ Testing, Results and Discussions, Conclusions, Acknowledgements, References. Figure, Equations, Tables etc formatting and editing</p> <p>Journal List (Top 50 Journals)Journal rankings (https://www.scimagojr.com/journalrank.php), Find identify and short list the Top 50 research journals in respective engineering branch. Understand the quality, quantity, extent and most importantly the novelty of research work is required to publish into such reputed Journals</p> <p>Selection of the journal</p> <p>Indexing, impact factor, open access, Scopus indexed, Web of Science indexed Journals (SCI and SCIE) indexed journals</p> <p>Use of various online journal selection tools</p> <p>Springer (https://journalsuggester.springer.com/) Elsevier (https://journalfinder.elsevier.com/) Web of Science (https://mjl.clarivate.com/home)–Manuscript Matcher (It can be used after creating free account)</p> <p>Plagiarism checking</p> <p>Use of various online free plagiarism checker tools as well as licensed software tools like iThenticate (https://www.ithenticate.com/)</p>

<p>Improving contents of the paper</p> <p>Based on the Plagiarism reports the manuscript draft can be refined and modified in order to make it not only unique but also technically and grammatically correct.</p> <p>Patent search</p> <p>Indian patent journal (https://ipindia.gov.in/journal.htm), Google Patent Search (https://patents.google.com/), International Patents, (https://patentscope.wipo.int/search/en/search.jsf) USA patent (https://www.uspto.gov/patents/search)</p> <p>Patent drafting and Filing: Understand the forms, documentations and steps and the official procedure involved in the process of Patent drafting and filing</p> <p>Writing answers to reviewer questions: - Addressing the queries/ comments/ questions raised by Research Journal reviewers in appropriate format with sound scientific and technical justification</p> <p>Modification in manuscript</p> <p>Modify the research paper manuscript as per the rational suggestions given by the reviewer or Journal</p>	

Editor

Checking of publication draft

Important Task of Proof reading of the final manuscript; accepted for publication before it gets published. Meticulously checking personal details, affiliation and providing final remarks, suggestions to the Journal Publisher pertaining to the Manuscript.

Text Books:

1. Laurie Rozakis, "Schum's quick guide to Write Great Research Papers", 2 nd Edition, McGraw-Hill
2. Chris A. Mack, "How to write a good Scientific Paper", SPIE PRESS Bellingham, Washington USA (2018)
3. The Office Of Controller General Of Patents, Designs & Trademarks, "Manual Of Patent Office Practice and Procedure, version 3.0, Mumbai, India (2019).

Reference Books:

1. Anthony C. Winkler and Jo Ray Metherell, "Writing the Research Paper A Handbook", 8 th Edition, Wadsworth, Cengage Learning, Boston USA, (2011).
2. World Intellectual Property Organization, "WIPO Patent Drafting Manual", 2 nd Edition, Geneva, Switzerland (2022)

MOOCs Links and additional reading material

1. <https://nptel.ac.in/courses/110/105/110105091/> (Research Writing, by IIT Kharagpur)
2. <https://archive.nptel.ac.in/courses/127/105/109105115/> (Qualitative Research Methods And Research Writing, by IIT Kharagpur)
3. <https://archive.nptel.ac.in/courses/109/106/109106128/> (Patent Drafting for Beginners, By IIT Madras)

Course Outcomes:

The student will be able to

1. understand the structure of a research paper.
2. identify key research journals in different engineering areas and understand the importance of quality, extent and novelty in research papers
3. apply various online tools to select appropriate research journals based on different parameters
4. check plagiarism in the manuscript by using online plagiarism detection platforms and amend and improve its content accordingly
5. search different Patent (Indian/International) databases by using online patent search platforms
6. understand the process of Patent drafting and filing.
7. address the reviewer's queries, comments and do the proof reading of the manuscript

Course Name: ENGINEERING DESIGN AND INNOVATION - II

Course Code: ES1026

Credits: 4

Teaching Scheme: Lab: 8 Hours / Week

Activities

This course is Project Centric Learning providing hands on experience to students. Theoretical inputs / information will be provided through Design Thinking 1 Sessions already conducted in SEM 1 while actual designing and implementations of project work is done through Engineering Design and Innovation 2 (EDI-2) Course.

Step by step Implementation of activities by the students:

1. **Group Formation Activity:** - Project group formation within the allotted EDI-2 Project batch, deciding Group leader and Assistant Group Leader
2. **Brain Storming and Discussion Activity:** - Discussion on topics for EDI-2 Project pertaining to socially relevant areas as discussed in the subject Design Thinking 2 (DT2). Discussion on Domain areas and identifying the domain area
3. **Dissuasion** on the selected domain area and required Tools and Technology also discussed in the subject Design Thinking 2 (DT2) for the project
4. **Project Planning Activity:-** Discussion on Tools and Technology, Finalization of EDI-2 Project topic considering appropriate Domain area, Tools & Technology in consultation with EDI-2 Project Guide
5. **Project Planning Activity:-** Finalization of Problem statement, objectives, methodology and systematic strategy to complete the EDI-2 Project in consultation with EDI-2 Project guide
6. **Synopsis Drafting Activity:-** Prepare Synopsis of the planned EDI-2 Project under the guidance of EDI-2 Project guide and complete its online Registration
7. **Team Work Activity:-** Report and update about project work progress regularly to EDI-2 Project guide and timely complete the assigned tasks by him. Seek his advice guidance whenever required.
8. **Self Learning Activity:-** Refer available online offline Resources, books, soft materials, consult with domain expertise in context with the project
9. **Self Learning Activity:-** Learn the required tools, skill sets, acquire knowledge through relevant MOOCs for the project
10. **Project Review 1 , Mid Semester Assessment & Project Review 2:-** As part of in semester assessment of the Capstone Project appear for the timely conducted project reviews by EDI-2 Project guide to evaluate student progress
11. **Project Prototype Designing Activity:-** Designing of project prototype based on domain areas by incorporating appropriate tools and technology
12. **Prototype Validation and Testing Activity:-** Validation and Testing Activity of the prototype and the obtained results to give the best possible solution

13. **Project Report/Paper Writing Activity:-** Completion of the set objectives of project and to start writing report of the EDI-1 Project in IEEE Research paper format
14. **Project Report/Paper Writing Activity:-** Results and Discussions, writing the Interpretation of the obtained results of the accomplished EDI-2 Project work in the report i.e. IEEE paper in systematic format and preparing the final PPT for final end semester assessment of the project
15. **Final checking and Report/Paper Proof Reading Activity:-** of the IEEE project paper and PPT by EDI-2 Project guide followed by its approval after doing the needful corrections.
16. Online submission of pdf of the IEEE Paper based of EDI-2 Project for the record
17. **End Semester Assessment:-** Present the IEEE Paper based of EDI-2 Project 2 project and the PPT at Student EDI-2 Project Conference on the scheduled date as part of End Semester Assessment of the EDI-2 Project.
18. **Paper presentation on the project work Conference :-** Present the as prepared paper on the Project work at suitable National/International Conference
19. **Journal Publication :-** Publish the quality project work in a peer reviewed and International/ National Research journal with reputed indexed in Web of Science/Scopus/UGC CARE)
20. **Patent/ Innovation :-** If the project work done has novelty, innovation and future commercial aspects then file a Patent on it

Text Books:

1. K Nagrajan , Project Management 2nd Edition, New age International Ltd.(2004)
2. Pradeep Pai, Project Management, 1st Edition, PEARSON INDIA (2019)
3. Yousef Haik and Tamer M. Shahin, "Engineering Design Process", Cengage Learning, Second Edition, 2011

Reference Books:

1. H. S. Fogler and S. E. LeBlanc, "Strategies for Creative Problem Solving", 2nd edition, Pearson, Upper Saddle River, NJ, 2008.
2. A. Whimbey and J. Lochhead, "Problem Solving & Comprehension", 6th edition, Lawrence Erlbaum, Mahwah, NJ, 1999.
3. M. Levine, "Effective Problem Solving", 2nd edition, Prentice Hall, Upper Saddle River, NJ, 1994.
4. John. R. Karsnitz, Stephen O'Brien and John P. Hutchinson, "Engineering Design", Cengage learning (International edition) Second Edition, 2013

Course Outcomes :

The student will be able to –

1. identify projects relevant societal needs
2. map the technologies learned with the project needs
3. apply the technological knowledge to design various feasible solutions
4. select best possible solution to solve the problem
5. develop/Fabricate a working model of the proposed solution
6. testing and validate product performance

Course Name: MOBILE APPLICATION DEVELOPMENT**Course Code: ES1037**

Credits: 1	Teaching Scheme: Lab: 2 Hours / Week
Section I	
<p>Introduction: About Android, Pre-requisites to learn Android, Dalvik Virtual Machine & .apk fileextension, Android API levels (versions & version names)</p> <p>Android Java Basics: Getting started with Android development, project folder structure, simple programming, running project, generating build/APK of the app from Android Studio</p> <p>First application: Creating Android Project, Android Virtual Device Creation, Set up debugging environment, Workspace set up for development, Launching emulator, debugging on mobile devices.</p> <p>Basic UI design: Basics about Views, Layouts, Drawable Resources, Input controls, Input Events, Toasts.</p> <p>More UI Components: Layouts – GridView and ListView, Action bar, Adapters, Menus: Option menu, context menu, sub menu, Pickers - Date and Time, Spinners.</p>	
Section II	
<p>Activity and Fragment: Activity, Fragment, Activity Lifecycle and Fragment Lifecycle.</p> <p>Intents: Implicit Intents, Explicit intents, communicating data among Activities.</p> <p>Navigation Drawer: Panel that displays the app's main navigation screens on the left edge of the screen</p> <p>Android Notifications – Toast, Dialogs (Time Picker, Date Picker, Progress, Alert), Notification Manager and Push Notification</p> <p>Introducing SQLite – SQLiteOpenHelper and creating a database - Opening and closing a database, Working with cursors Inserts, updates, and deletes</p> <p>As a term project student should implement a mobile app with the following:</p> <ul style="list-style-type: none">• Understand the app idea and design user interface/wireframes of mobile app• Set up the mobile app development environment	
List of Practical:	
<ol style="list-style-type: none">1. Develop an application that uses GUI components, Font and Colors.2. Develop an application that uses Layout Managers and event listeners.3. Develop a native calculator application.4. Write an application that draws basic graphical primitives on the screen.5. Develop an application that makes use of database.6. Develop an application that makes use of RSS Feed.7. Implement an application that implements Multi-threading.8. Develop a native application that uses GPS location information.9. Implement an application that writes data to the SD card.10. Implement an application that creates an alert upon receiving a message.11. Write a mobile application that creates alarm clock.	

Screen Shots of the application :

- | | |
|-------------------------------------|---|
| 1. GUI components, Font and Colors. | 2. Layout Managers and event listeners. |
| 3. Calculator. | 4...Basic graphical primitives. |
| 5. Database Application. | 6. RSS Feed Application. |
| 7. Multi-threading Application. | 8. GPS location information. |
| 9. Writes data to the SD card. | 10. Alert upon receiving a message. |
| 11. Alarm clock Application. | |

Text Books:

1. Head first Android Development.
2. Android Programming: Pushing the Limits, Wiley By Erik Hellman
3. Lauren Darcey and Shane Conder, "Android Wireless Application Development", Pearson Education, 2nd ed. (2011)

Reference Books:

1. Pradeep Kothari, Android Application Development Black Book, Dreamtech Press, KLSI

Course Outcomes:

The student will be able to –

1. identify various concepts of mobile programming that make it unique from programming for other platforms
2. program mobile applications for the Android operating system that use basic and advanced phone features
3. analyse mobile applications on their design pros and cons
4. utilize rapid prototyping techniques to design
5. develop sophisticated mobile interfaces

Course Name: HUMAN ENGINEERING

Course Code: HS1033

Credits: 2	Teaching Scheme: Theory: 2 Hours / Week
<p>Philosophy: The system of nyaya (logic) and analysis of various means of acquiring knowledge: empiric, speculative and from a person of authority.</p> <p>Philosophy of sankhya (counting the elements) and an analysis of the 24 elements found in the universe as per sankhya and its basis. Connection to modern science and related research of body, mind and consciousness studies</p> <p>Influence of three modes or qualities of nature on the mind and the individual. Discussion of various examples where one observes each of these qualities or a combination of them.</p> <p>A brief study of the Patanjali yoga sutras and the various stages of kriya yoga and their application.</p> <p>Role of Asanas (sitting postures) and pranayama (breath control) with respect to ones' body and mind</p> <p>Summary of the six systems of Indian philosophy and their applications to one's personal and professional life.</p>	
<p>Health Sciences: - Human Anatomy, General Diseases that causes impact on Human health and their Prevention and Cure, Ideal Human Health Parameters and their Measurement,</p> <p>Diet and their Impact on Health and Lifestyle and their Side Effects, Life Style Management for Better Health (Modern and Vedic)</p>	
Text Books:	
<ol style="list-style-type: none"> 1. BKS Iyengar, "Light on yoga sutras of Patanjali" 2. Rajiv Malhotra, "Being Different: An Indian Challenge to Western Universalism", Happer Collins Publishers India, ISBN No: 978-93-5116-050-2. 3. SuhotraDasa, Tapovanachari, "The Six systems of Vedic Philosophy", (Online PDF book) 4. K. Park, Preventive and Social Medicine, Bhanot Publishers 	
Reference Books:	
<ol style="list-style-type: none"> 1. Devamrita Swami, "Searching for the Vedic India", Bhaktivedanta Book Trust, ISBN 0-89213-350-3. 2. Jostien Garder, "Sophies World - A Novel about the History of Philosophy", Berkeley Books, New York, USA, 1996. 6. F. Max. Muller, "The six systems of Indian Philosophy". 	
Course Outcomes:	

The student will be able to –

1. apply the most appropriate tool of acquiring knowledge for a suitable object of knowledge.
2. understand the purpose of the 8 steps of the Yoga sutras
3. evaluate consequences of Yoga sutras on the human mind.
4. classify disease categories and identify various diseases and their impact
5. recognize ideal human health parameters and their measurements, basic emergency managements
6. demonstrate selection and maintenance of personal protective equipment

Course Name: GENERAL PROFICIENCY

Course Code: HS1037

Credits: 1	Teaching Scheme: Lab: 2 Hours/Week
Section I: Language Awareness and General Awareness	
<ul style="list-style-type: none"> ➤ Importance of English and foreign languages. ➤ Formal mechanisms of Language proficiency certifications like TOFEL, IELTS, PET, JLPT, TestDaF, DSH, TCF etc. ➤ Communication skills: Meaning, need, significance and types (written/oral, formal/informal, internal/external etc), Barriers in communication, How to start a communication?, Communication process (Articulation of thought) Concept of KISS(Keep It Short and Simple), Importance of nonverbal communication. Public speaking meaning, do's and don'ts ➤ Technical writing-Project, Innovation & Research - comparison. Writing SOPs. Importance of peer review & publications, protecting intellectual property - trademark, copyright & patents. ➤ Time management (Concept and importance), Techniques and rules and regulations during GD, Do's and don'ts in GD. 	
Section II: Human Values	
<ul style="list-style-type: none"> ➤ Life Skills- Empathy, Critical thinking, Creative thinking, Decision making, Coping with stress, Coping with emotion ➤ Understanding Value Education, Living a Fulfilling Life, Complementarity of Values and Skills, Harmony in the Human Being, Harmony in the Nature ➤ Universal Human Values, Human Values pertaining to the Self and the Body, Human Values pertaining to the Family, Human Values pertaining to Nature, Human Values pertaining to Existence ➤ Appreciating skills like negotiation, time management, positive thinking, recognizing diversity, networking etc. Contribution towards society, social initiatives. ➤ Etiquettes and manners: meaning and significance, Attitude, organizational ethics, Telephonic etiquettes, table manners, professional etiquettes, hygiene and clothing manners. ➤ Team building and leadership, Concept of team: difference between team and group, process of team building, significance and methods to develop team spirit, Characteristics of a leader. Walk the talk. 	
List of Practical:	
1.Self- Introduction 2. Paragraph Writing 3. Analyse a newspaper article 4. Dialogues, Situational conversation, Relay conversation. 5. Etiquettes and manners 6. Introduction to Human values:sharing about oneself, human consciousness, 7. Harmony : difference of needs of self and body, source of imagination of self 8. Four orders of nature 9. Ethical Human conduct 10. Submission	
Text Books:	

- 1.Dr. K Alex,"Soft Skills", S.Chand and company ltd.
- 2.Mark Ibbotson,"Cambridge English for engineering", Cambridge university press, Delhi.
- 3.R R Gaur, R Asthana, G PBagaria,"A Foundation Course in Human Values and Professional Ethics", 2nd Revised Edition, Excel Books, New Delhi, 2019. ISBN 978-93-87034-47-1.

Reference Books:

- 1.Daniel Coleman, "Emotional Intelligence", Bantam Book, 2006, ISBN:055380491X, 9780553804911
- 2.Shiv Khera, "You can win", A&C Black, ISBN: 9780230331198.

Course Outcomes:

The student will be able to –

- 1.use writing skills for formal documents.
- 2.demonstrate professional etiquettes in a workplace.
- 3.develop awareness about universal human values in students.
- 4.become more aware of themselves, and their surroundings.
- 5.translate knowledge, attitude and values into actual abilities.
- 6.to present sustainable solutions to the problems in society and nature.

Course Name: GENERAL PROFICIENCY

(German)

Course Code: HS1037

Credits: 1	Teaching Scheme: Lab: 2 Hours / Week
<p>Introduction to German : Alphabets and sounds. International words in German. Introducing oneself and others. Times of the day. Greetings according to time of the day. Listening to conversations in day life situations</p> <p>Grammar: Personal pronouns. Conjugations of weak verbs.</p> <p>Food and drinks: Starting conversations. Meeting in Cafes. Vocabulary for food and drinks. Ordering food and paying the bill. Numbers. 1-1000. Tell and understand telephone numbers. Dates. Cities and countries. Nationalities and languages.</p> <p>Grammar: Present and past tense of to be and have. Strong verbs. Forming and answering Wh questions and closed questions. Definite, indefinite articles. Singular and plural.</p> <p>Living in Germany: Types of Houses , Types of Rooms, Description of rooms. Furniture in the house. Countries, nationalities and languages. Directions and telling location. Family and relationships. Hobbies and pass time activities.</p> <p>Grammar: Adjectives and Opposites. Nominative and Accusative cases. Negation</p> <p>Time: Writing E-Mails, Times of the day, weekdays and months. Learning clock hours, Taking formal appointments and casual meetings. Describing daily routine .Giving excuses for delays and absence. Professions and the describing responsibilities involved in that professions.</p> <p>Grammar: Possessive pronouns. Separable verbs</p> <p>Professions and responsibilities: Asking for place of work and answering Mode of transport for the same .Orientation of a workplace. Different professions and professional life .Responsibilities at the workplace.</p> <p>Grammar: Wechsel prepositions and variable cases, Ordinal numbers</p> <p>An excursion through Berlin: Tourism in Berlin, culture, places worth visiting, planning trips with the help of city map and bus / tram schedules. Narrating a trip. Asking for road directions and giving them to others.</p> <p>Grammar: Modal verbs, writing a post card.</p>	
Text Books:	
1. Studio d A1 Deutsch als Fremdsprache – Kurs- und Uebungsbuch – by Funk, Kuhn and Demme published by GOYAL SaaB and Cornelsen	
Course Outcomes:	
<p>The student will be able to</p> <ol style="list-style-type: none"> pronounce the words correctly according German language rules and formulate small and simple sentences in German using basic grammar structures. 	

2. describe various types of houses and furniture items in various rooms of a house.
3. make a conversation in German in daily life situations using vocabulary related to classrooms, family, restaurants, jobs, days, months etc
4. write emails, SMS or small essays in German.
5. read and understand small texts, advertisements, instructions in German.
6. read and tell time and use it for making an appointment and cancelling it.

Course Name: GENERAL PROFICIENCY

(Japanese)

Course Code: HS1037

Credits: 1	Teaching Scheme: Lab: 2 Hours / Week
Orientation (Jikoushokai, Aisatsu & Moji)	
<ul style="list-style-type: none"> • Theory: Orientation Lecture • Introduction of Hiragana script with basic words • Youon, Sokuon, Chouon – Methods of writing words • Greetings and Classroom Expressions • Etiquettes and mannerisms 	
Introduction Of Katakana (Moji Katakana)	
<ul style="list-style-type: none"> • Introduction of Katakana script • Introduction of Katakana rules • Katakana words used in daily life 	
Calender & Numbers (Suji, Youbi, Hizuke, Jikaan)	
<ul style="list-style-type: none"> • Introduction of numbers • Writing Days of the week, Dates, Time, Months in Hiragana • Special Greetings used in different situations in Japan 	
Basic Grammar Pattern (Bunnokatachi, Keiyoushi-To, Doushi)	
<ul style="list-style-type: none"> • Introduction of ~は~です pattern • Affirmative, Negative and interrogative sentences • Introduction of demonstrative pronouns • Learning い and な adjectives and opposites • Introduction of some basic and useful verbs and their simple present tense 	
Introduction Of 3rd Script Kanji (Kanji & Kanji Jukugo)	
<ul style="list-style-type: none"> • Basics of Kanji • Kanji for Numbers (1-10) • Kanji for basic words 	
Culture Of Japan (Nihon-No-Bunka)	
<ul style="list-style-type: none"> • Some festivals in Japan • Arts of Japan • Foods and Dress of Japan • Islands and seasons of Japan • Some special things about and in Japan • Revision of all topics and paper 	

Text Books:

1. Yoko Hasegawa, Elementary Japanese, Vol. 1, Tuttle Publishing

Course Outcomes:

The student will be able to

1. greet formally and introduce himself/herself in Japanese language with appropriate etiquettes and mannerism.
2. read and write Hiragana, Katakana, Scripts along with basic words, numbers, dates, telephone nos., days of the week, months, year, time.
3. read and write 3rd Script Kanji i.e Kanjis for nos., Days, dates, time, years as well as some basic words.
4. read/Write sentences using basic sentence pattern including all three scripts.
5. tell about his/her family. Describe things using basic adjectives and actions by using basic verbs.
6. become familiar to fascinating country like Japan & Japanese culture.

Course Name: GENERAL PROFICIENCY

(French)

Course Code: HS1037

Credits: 1	Teaching Scheme: Lab: 2 Hours / Week
<p>Introduction: Alphabets, Numbers (0-100), Months, days of the week, Difference between Tu/Vous, Self, Introduction, Date of birth, Telephone numbers, Basic salutations.</p> <p>Ecole de francais, Paris: Au secretariat: Indefinite Articles (c'est ce sont) Definite Articles, Introduction of third person, Nationalities, professions, Irregular verbs –Etre / Avoir.</p> <p>Autour de l'école: Vocabulary related to family and colours, Regular « er » ending verbs, Prepositions, Directions.</p> <p>La vie quotidienne: Quelle heure est- il?, Verbs « aller, venir, faire », Interrogation (yes /no), Reflexive verbs.</p> <p>Ma chambre : Vocabulary for room and house, Regular “ir” ending verbs, Concept of si, oui and non, Les adjectifs possessifs.</p> <p>Une Randonnée : La négation, Concept of Jouer a/jouer de.</p>	
Text Books:	
Manjiri Khandekar and Roopa Luktuke; JUMELAGE;Saraswati House Pvt Ltd.	
Course Outcomes:	
<p>The student will be able to</p> <ol style="list-style-type: none"> 1. greet formally as well as informally and introduce himself or herself in French, Read and write numbers, dates, telephone numbers, days of the week. 2. describe the culture of France and form grammatically correct sentences and introduce third person. 3. ask or tell the directions to reach the destination and describe your family. 4. tell and ask time, frame basic questions and describe your routine. 5. write emails, letters and small essays in French and describe your room using relevant vocabulary. 6. make negative sentences and use them in the dialogues. 	

Course Name: GENERAL PROFICIENCY**(Chinese)****Course Code: HS1037**

Credits: 1	Teaching Scheme: Lab: 2 Hours / Week
<p>Developing oral skills [intensive and supplementary vocabulary]</p> <ul style="list-style-type: none"> • Greetings • Introducing Oneself and Others • Asking for Personal Information • Talking About Date • Talking About Time • Talking About Age • Talking About Plans <p>Outline of Grammar, Chinese Numerals - Nominal Classifiers – Sentences with Adjectival Predicate - Interrogative Sentences - Structural Particle - Verbs and Verbal Classifiers - Interrogative Pronouns and Prepositions - Sentences with Nominal Predicate - Affirmative-Negative Questions - - Modal Particle indicating Change - Alternative Questions - Confirmation Question - Approximate Numbers - Aspect Particle indicating Completion of Action - Reduplication of Verbs - Modal Verbs</p>	
Text Books:	
Beijing Language Institute. comp., CHINESE CONVERSATION FOR FOREIGNERS (LU) Vol 1 (selected lessons). Beijing: BLCUP, 2006	
Course Outcomes:	
<p>The student will be able to</p> <ol style="list-style-type: none"> 1. greet formally as well as informally and introduce himself or herself in Chinese, Read and write numbers, dates, telephone numbers, days of the week. 2. describe the culture of China and form grammatically correct sentences and introduce third person. 3. ask or tell the directions to reach the destination and describe your family. 4. tell and ask time, frame basic questions and describe your routine. 5. write emails, letters and small essays in French and describe your room using relevant vocabulary. 6. make negative sentences and use them in the dialogues. 	

Course Name: ENVIRONMENTAL SCIENCE

Course Code: ES1014

Credits: Audit	Teaching Scheme: Lab: 2 Hours / Week
Section I	
<p>Nature of environmental studies: Definition, scope, importance, multidisciplinary nature of environmental studies, need of public awareness, Role of an individual in conservation and equitable use of natural resources, sustainable lifestyles, Natural resources and associated problems : Forest, water, mineral, food, energy, land resources</p> <p>Ecosystems: Concept, Structure, function, characteristics of ecosystems, energy flow in ecosystem, producers, consumers, and decomposers, ecological succession</p> <p>Biodiversity and its conservation: Introduction, value, hot spots of biodiversity, threats to biodiversity, conservation of biodiversity</p>	
Section II	
<p>Environment pollution: Introduction, definition, types of pollution, cause and effect of pollution, solid waste management, role of an individual in prevention of pollution, disaster management</p> <p>Social issues and the environment: Unsustainable to sustainable development, urban problems related to energy, water conservation, environmental ethics, climate change, global warming, ozone layer depletion, wasteland reclamation, consumerism and waste products</p> <p>Environmental protection: Environmental protection act, AIR (Prevention and Control of Pollution) Act, Water (Prevention and Control of Pollution) Act, Wildlife protection act, Forest conservation act, population growth and human health, human rights</p>	
Text Books:	
<ol style="list-style-type: none"> 1. Erich Bharucha, "Textbook of Environmental Studies for Undergraduate Courses", Second Edition, UGC Publications. 2. Mackenzie L. Davis and David A. Cornwell, "Introduction to Environmental Engineering", 4e, Tata McGraw-Hill Education Private Limited New Delhi, 2010. 3. J. Tyler Jr. Miller and Spoolman, "Environmental Science with Mindtap", 14th Edition, Cengage Learning, 2014. 	
Reference Books:	
<ol style="list-style-type: none"> 1. Gilbert M. Masters, "Introduction to Environmental Engineering and Science", 2e, Pearson Education. Dorling Kindersley (India) Pvt. Ltd. Delhi, 2007. 2. J. Glynn Henry and Gary W. Heinke, "Environmental Science and Engineering", 2e. Pearson Education (Singapore) Pte. Ltd, 2004. 	
Course Outcomes:	
<p>The student will be able to –</p> <ol style="list-style-type: none"> 1. Recognize renewable and non-renewable resources and associated problems and plan different 	

activities to create awareness among the people and hence to conserve resources by minimizing degradation of environment.

2. Understand different types of ecosystems and their importance in balancing the nature.
3. Understand concept of biodiversity at national and global level and need to preserve it.
4. Understand different types of pollutions and hence to find the remedial measures to minimize ill effects.
5. Recognize various disaster and solid waste management techniques.
6. Understand and appreciate the ethical, cross-cultural, and historical context of environmental issues and the links between human and natural systems.

Course Name: INDIAN DEMOCRACY AND CONSTITUTION

Course Code: HS1036

Credits: Audit	Teaching Scheme: Theory: 2 Hours / Week
Section I	
<p>Democracy in India: a) Indian parliamentary democracy b) Lok Sabha c) Rajya Sabha</p> <p>Important concepts of Indian Democracy - a) Fundamental rights in Indian constitution b) Fundamental duties in Indian constitution c) Challenges of national integrity</p> <p>Good Governance a) Meaning and concepts of good governance b) Government and governance c) Good governance from directives principles of state policy</p>	
Section II	
<p>Introduction to Constitution - Meaning and importance of the Constitution, salient features of Indian Constitution. Fundamental Duties Content. History of the Indian Constitution. Constitution and Constitutionalism.</p> <p>Preamble to the Indian Constitution - Philosophy of the Fundamental Rights. Different important Articles from the Indian Constitution.</p> <p>Directive Principles of State Policy - An Introduction to Directive Principles of State Policy.. Fundamental Duties in the Indian Constitution.</p>	
Text Books:	
<p>1. M.V.Pylee, "Introduction to the Constitution of India", 4th Edition, Vikas publication, 2005.</p> <p>2. M P Jain, "Indian Constitutional Law", Eight Edition, Justice Jasti Chelameswar</p>	
Reference Books:	
<p>1. Durga Das Basu, Introduction to the Constitution of India, Gurgaon; LexisNexis, 2018 (23rd edn.).</p> <p>2. Merunandan, "Multiple Choice Questions on Constitution of India", 2 nd Edition, Meraga publication, 2007</p>	
Course Outcomes:	
<p>The student will be able to –</p> <ol style="list-style-type: none"> 1. Students will analyse the democratic framework with the help of its standards of governance. 2. Students will critically examine election process in the country. 3. Students will enhance their understanding of good governance. 4. Students will analyse the Indian political system, the powers and functions of the Union, State and Local Governments in detail. 	

Course Name: PROFESSIONAL DEVELOPMENT

Course Code: HS1038

Credits: Audit	Teaching Scheme: Lab: 2 Hours/Week
Section I: Campus Awareness and Self Awareness	
<ul style="list-style-type: none"> ➤ Institute information- Overall orientation, tour to college campus, Guidance to students about future. ➤ Branch wise Opportunities -Exposure to the department level activities, scope of the department ➤ Rules, dress code & Ethics-Rules to be followed on college campus, Dress code to be followed by students ➤ SWOC Analysis- Doing SWOC of organization, a well-known personality or friend. ➤ Importance of mandatory documents. Indian students must possess Aadhar, Passport, Driving License, Voter Id, Credit/ debit card, International students must have valid passport & visa approval, driving license, address proof. ➤ Life Skills- Appreciating skills like negotiation, time management, positive thinking, recognizing diversity, networking etc. Contribution towards society, social initiatives. ➤ Effective utilization of winter & summer vacation. ➤ SWOC Analysis-Self Analysis, Doing SWOC for self (Strengths, Weakness', Opportunities, Challenges) ➤ Career opportunities- Finding the future career opportunities, Guidance by expert, Finding own long term short term and medium term goals. ➤ Career planning, making choices of career - Filling up career choices form. 	
Section II: Professional Awareness	
<ul style="list-style-type: none"> ➤ General knowledge and awareness, Current affairs, technical, Financial and business ➤ Personal training – physiology, Family background and networking, ➤ Career Opportunity-Corporate job-types, Skills required for Higher studies, Public sectors, Entrepreneurship ➤ Corporate Jobs- IT and Non IT Jobs, Higher Studies – Education India- IIM, IIT, NIT, IIIT, Education Abroad- Country, Cost and Documents required, MBA. ➤ Public Sectors- Jobs, DRDO, IUCAA, ISRO, HAL ➤ Entrepreneurship – Startup Vs job, who wants to start, Type of start-up, Beneficial for start-up – grants , Steps for start-up, Patents, Success rate of start-up ➤ Resume writing, Selection Process 	
Submissions: Submissions to be accepted as scanned soft copy. Checklist to be prepared as follows	
<p>1. Aadhar card /(India & abroad Address proof for international students)</p> <p>2. Passport 3. Driving License 4. Voter ID 5. English or foreign language proficiency proof 6. Aptitude assessment proof (Must) 7. SOP of one research statement (Must)8. Career planning form submission (Must) 9. SWOC Self – Analysis (Must)</p>	

Course Outcomes:

The student will be able to –

2. find opportunities available in her/his domain.
3. be ready to explore opportunities.
4. analyze strengths, weakness, opportunities and challenges.
5. decide his career goal and explore different career opportunities.
6. develop necessary professional skills.
7. write resume in efficient and presentable format.

Course Name: Induction Training**Course Code: HS1028**

Credits: Audit	Teaching Scheme: Lab: 2 Hours/Week
Section I	
<ul style="list-style-type: none">➤ Physical activity➤ Creative Arts➤ Universal Human Values➤ Literary	
Section II	
<ul style="list-style-type: none">➤ Proficiency Modules➤ Lectures by Eminent People➤ Visits to local Areas➤ Familiarization to Dept./Branch & Innovations
