Rotational and Translational motion (Linear)

We have seen how rotation matrices are formed.

Actually there is always a translational (linear) motion along with a rotational motion.

The calculation becomes little more complicated.

Let us see how is this done !

Translational motion (Linear) and the Displacement Vector (Matrix)

Frame 1 is translated in the direction of **X** axis.

Frame 1 is translated in the direction of **Y** axis.

Frame 1 is translated in the direction of **Z** axis.

Translational motion in two directions

$$D_1^0 = \begin{bmatrix} a \\ b \\ 0 \end{bmatrix}$$

What type of Matrix will you get, if the translational motion is done along all 3 directions ?

$$D_1^0 = \begin{bmatrix} a \\ b \\ c \end{bmatrix}_{3 \times 1}$$

Frame 1 is translated in the direction of **X** axis and then in **Y** axis.

Rotation of a point around an axis and Translation -

$$\begin{pmatrix} ? & ? & ? \\ ? & ? & ? \\ ? & ? & ? \end{pmatrix}$$

What will be dimension of the Matrix now ?

Rotation of a point around an axis and Translation -

$$\begin{pmatrix} ? & ? & ? \\ ? & ? & ? \\ ? & ? & ? \end{pmatrix}$$

Will 3x3 be enough ?

Rotation
Matrix

Translation
Matrix

$$\begin{pmatrix} ? & ? & ? & ? \\ ? & ? & ? & ? \\ ? & ? & ? & ? \\ ? & ? & ? & ? \end{pmatrix} 4 \times 4$$

Scaling Factor

Rotation and Translation together -

Rotation
Matrix

$$\begin{pmatrix} \cos\theta & -\sin\theta & 0 \\ \sin\theta & \cos\theta & 0 \\ 0 & 0 & 1 \\ 0 & 0 & 0 \end{pmatrix}$$

Translation
Matrix

$$\begin{pmatrix} 0 \\ 0 \\ 0 \\ 1 \end{pmatrix}$$

Scaling Factor – which
represents stretching or
shrinking

For e.g.

Find what type of movement
this robot is doing ?

$$\begin{pmatrix} 1 & 0 & 0 & 3 \\ 0 & 1 & 0 & -5 \\ 0 & 0 & 1 & 0 \\ 0 & 0 & 0 & 1 \end{pmatrix}$$

This 4x4 matrix is called as Homogeneous Transformation Matrix –

Rotation and Translation together -

Find what type of movements this robot is doing ?

From DH 1 =

$$\begin{pmatrix} 1 & 0 & 0 & 0 \\ 0 & 1 & 0 & 0 \\ 0 & 0 & 1 & 0 \\ 0 & 0 & 0 & 1 \end{pmatrix}$$

To DH 2 =

$$\begin{pmatrix} 1 & 0 & 0 & 2 \\ 0 & 1 & 0 & 3 \\ 0 & 0 & 1 & 0 \\ 0 & 0 & 0 & 1 \end{pmatrix}$$

To DH 3 =

$$\begin{pmatrix} 0.866 & -0.5 & 0 & 0 \\ 0.5 & 0.866 & 0 & 0 \\ 0 & 0 & 1 & 0 \\ 0 & 0 & 0 & 1 \end{pmatrix}$$

To DH 4 =

$$\begin{pmatrix} 0.707 & 0.707 & 0 & 3 \\ 0.707 & 0.707 & -0.6427 & 0 \\ 0 & 0.6427 & 0.766 & -2 \\ 0 & 0 & 0 & 1 \end{pmatrix}$$

Rotation and Translation together -

Find what type of movements this robot is doing ?

From DH 1 =

$$\begin{pmatrix} 1 & 0 & 0 & 0 \\ 0 & 1 & 0 & 0 \\ 0 & 0 & 1 & 0 \\ 0 & 0 & 0 & 1 \end{pmatrix}$$

To DH 2 =

$$\begin{pmatrix} 1 & 0 & 0 & 2 \\ 0 & 1 & 0 & 3 \\ 0 & 0 & 1 & 0 \\ 0 & 0 & 0 & 1 \end{pmatrix}$$

To DH 3 =

$$\begin{pmatrix} 0.866 & -0.5 & 0 & 0 \\ 0.5 & 0.866 & 0 & 0 \\ 0 & 0 & 1 & 0 \\ 0 & 0 & 0 & 1 \end{pmatrix}$$

To DH 4 =

$$\begin{pmatrix} 1 & 0 & 0 & 3 \\ 0 & 0.766 & -0.6427 & 0 \\ 0 & 0.6427 & 0.766 & -2 \\ 0 & 0 & 0 & 1 \end{pmatrix}$$
